DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The disclosure is objected to because of various informalities. The specification includes many grammatical and idiomatic errors seemingly a result of a literal translation of the disclosure into English, resulting in an unclear description of the present invention. As an example, on page 10, line 18, the description "from rearward" is not only improper but also confusing.

Appropriate correction of these informalities throughout the specification is required.

Claim Objections

3. Claims 1-8 are objected to because of various informalities. The claims include many grammatical and idiomatic errors seemingly a result of a literal translation of the claims into English. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, the phrase "said arm being contacted with an inner wall" is unclear and indefinite. In claim 6, the term "tip" throughout the claim appears to be interchangeably referring to both the tip of the arm and the tip of the second bending part. Furthermore, it is unclear how the second bending part is "being lowered" as claimed. In claim 8, the term "roughly" is vague and indefinite. Correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Japanese reference 09-244117 to Mitsuo. Mitsuo discloses all that is claimed including a camera with a battery chamber, a cover with conductive properties, an arm having first and second bending parts and formed as part of the battery contact member wherein the second bending part contacts the inner wall of the cover while the tip of the arm is spaced apart from the cover. The battery chamber of Mitsuo is mounted on the main body of the camera and is semi-circular in shape. The applicant is directed to the figures of Mitsuo where all the aforementioned features are illustrated.
